

Axle Options

Simplicity Leaf

The most popular of suspension options. Designed for any terrain, the load-sharing leaf suspension is a simple and easily manageable axle. Available in both single and tandem.

Simplicity Load Sharing Coil

Similar to the Smart Coil, the LSC is a tandem design, ideal for heavier loads. Fabricated for both on-road and off-road use.

Simplicity Smart Coil

Perfect for smaller, light weight trailers or caravans. The variable coil spring offers a smoother ride with the help of the single shock absorber.

Simplicity Airbag Suspension

The Airbag option is a non-load-sharing design, manufactured for mostly sealed road usage. Leveling your caravan with ease.
